

Resources for **Genomics, Human Behavior, and Social Outcomes**

- [“Genomics, Behavior, and Social Outcomes,”](#) by Daphne Martschenko and Lucas Matthews, a chapter in *The Hastings Center Bioethics Briefings*.
- [Genomic Findings on Social and Behavioral Outcomes: FAQs on Human Genomics Studies](#), a repository of FAQs on genomics and behavior studies that clarify the findings.
- [“FoGS Provides a Public FAQ Repository for Social and Behavioral Genomic Discoveries”](#) by Daphne O. Martschenko, Benjamin W. Dominique, Luas J. Matthews, Sam Trejo, *Nature Genetics*, Sept. 6, 2021.
- [“Will Sociogenomics Reduce Social Inequality?”](#) by Erik Parens, *Hastings Bioethics Forum*, September 30, 2021.
- [GWAS Diversity Monitor](#) This database dynamically outlines which diseases and traits have (and have not) been studied across which ancestry groups over time and provides easy and searchable links to each individual study searchable by individual trait. It tracks diversity by disease in real time. It is maintained by the Leverhulme Center for Demographic Science in the Department of Sociology at University of Oxford.
